Eureka by ALLEN

Product Teardown & Growth Opportunity

Eureka in One Line An active learning system for Class 10 board prep that replaces passive lectures and rote memorisation with animated storytelling, interactive prompts, and guided problem-solving — making understanding feel more like following a narrative than attending a class.

Why It Stands Out

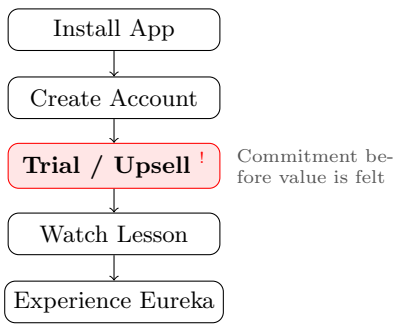

Most edtech platforms optimise for **content volume and exam drilling**. Eureka optimises for **engagement and conceptual clarity** — sitting at the intersection of gamified edtech and proven ALLEN coaching fundamentals.

Engagement style vs content depth across platforms

Key Insight: Story-led learning is Eureka's strongest differentiator. Every chapter follows a consistent narrative arc — more immersive than lecture-first platforms.

The Funnel Problem

Observation: The strongest part of the product appears *after* onboarding. Students are asked to commit before experiencing Eureka's value. Urgency appears before trust.

What Works

- Story-led curriculum — narrative over lectures
- **Watch → Learn → Ace** framework
- Strong visual and animated explanations
- Teacher credibility: profiles, philosophy, chapter ownership
- 24/7 AI doubt support
- ALLEN's 35+ year legacy and brand trust

What Doesn't Work

Selling Starts Before Learning

Enrollment prompts surface within minutes — before meaningful learning. Urgency before trust makes commitment feel premature.

Language Creates Friction

Chapters are English-first. Students who learn best in Hindi, Telugu, Tamil or Marathi hit a comprehension wall before they reach the value.

The Opportunity: Speak Their Language First

Before confusion begins, speak their language.

Recommendatioi	Why It Matters	Success Metric
Language Picker	Ask users to select a preferred language at onboarding (English, Hindi, Telugu, Tamil, Marathi, Bengali). One screen, zero friction.	% users selecting non-English language
Bilingual Notes	Translate concept notes before dubbed videos — faster to ship, immediately improves comprehension.	Notes open rate by language segment
AI Doubts in Local Lang	Students ask and receive doubt support in their preferred language via LLM-powered responses.	Session duration & support ticket drop

Expected Outcome: Students experience value sooner, understand faster, and build trust *before* being asked to commit.

Success Metrics

- % users selecting a non-English language (proxy for latent demand)
- Notes open rate by language segment vs English baseline
- Session duration growth post-language launch
- Conversion rate *after* first lesson experienced
- Support ticket drop post-language doubt launch

Let Eureka Prove It.

Let Them Learn. Then Let Them Choose.

The strongest path to conversion is not persuasion — it is comprehension.

Understanding builds confidence. Confidence drives engagement. Engagement drives conversion.
